Re: Annual HMA Plant Approval  
Facility No.10354

Gentlemen:

On March 10, 2008 personnel from the Materials Bureau staff inspected your bituminous concrete production facility located in Flushing, NY.

As a result of this inspection, it has been determined that the physical plant features, the automation and recordation equipment at this facility are in conformance with the requirements outlined in Section 401 of the New York State Department of Transportation Specifications of May 4, 2006.

Approval is hereby given to supply bituminous concrete from this facility to department projects during the 2008 construction season.

**Our specifications require periodic scale checks. Continued approval will be contingent upon satisfactory and timely completion of these scale checks, adherence to approved control plan, and all applicable safety requirements.**

Yours truly,

A handwritten signature in cursive script that reads "Paul Anderle".
